If any foreign materials are found to be mixed in the lot, other than the items included in the auction catalogue and acceptance letter/sale order, the seller reserves the right to remove them at the time of delivery. The buyer shall not be entitled to re-sell an item, lot or part of a lot while the goods are still lying within the premises of the seller and any such sale or assignment of the buyer's right to the material sold in an auction will not be recognized. ### 5. **Default by seller.**

The seller will not be, in any way, responsible for failure to deliver the material due to causes beyond his control such as a strike, lockout, cessation of work by labourers, shortened hours, act of God or other causes or other contingencies whatsoever. The buyer shall not be entitled to cancel the contract and the period of delivery shall automatically be extended proportionately.

### 6. **Default by buyer.**

Materials sold but not removed within the specified date will become the property of the seller and it will have the right to dispose of such goods in any manner as he deems fit without any notice.

  - ii) Accounts representative
  - iii) Representative of the security force

**8. Deliveries of scrap.**

At the time of delivery of scrap material to the purchaser, the weighment is to be done in the presence of the stockholder's representative, so nominated by the Head of Office. The stockholder representative and accounts representative will sign a joint statement indicating the type of scrap, name of the party to whom scrap is delivered and quantity as per the weighment slip. The stockholder should arrange for the deliveries to be effected according to the agreement and terms and conditions of sale. He should take every possible step to expedite delivery of the auctioned materials. The stock verifier should count, measure or weigh each lot or part of a lot after comparison of the description and quantity shown in the sold lot to ensure that only such kinds and quantities of materials as have been shown in the sold lot are being issued; he should sign the gate passes and issue notes in token of such check. In giving delivery of scrap of non-ferrous items, the material should be weighed on electronic weighing scales and the weight of each consignment should be recorded in detail by the stock verifier in his field book. All deliveries should be done through Electronic Weigh Bridges. All the Weigh Bridges should have valid certificate from Weight & Measurement Department of the State Government. The stock verifier should sign the issue note after fully satisfying himself that entries made therein agree with those in his field book. The field book should be attested by the other representatives making delivery of the goods in token of their having accepted the correctness thereof. The empty and loaded trucks or carts should be weighed and particulars of the gate pass issued recorded. The issue note and gate pass should be countersigned by the stock verifier. The loading of the sold materials should be done under the supervision of the stock-holder and be witnessed by other representatives. The stock-holder will be responsible for realizing the loading charges, if any, from the purchaser.

**9. Variation in available Quantity.**

At the time of delivery, the actual quantity may vary from the quantity mentioned in the delivery order. In case of excess available material, the seller reserves the right to retain material in excess of quantity in the lot at its discretion. The purchaser may be allowed to lift the additional quantity after making the requisite additional payment to the seller. If the quantity in a lot on actual weighment or count is less than the announced quantity, the seller will not make good the deficiency under any circumstances. The purchaser thereof will be entitled to obtain a refund for the undelivered quantity at the quoted rate. The interest will be paid on the amount of short delivered quantity. The reasons for shortfall should be recorded by the stock-holder and the Head of Office should also record his opinion. Any refund in this regard will be made with the Head of Office's recommendation, the Associated/integrated Finance Department's concurrence and CA' approval. Copies of the weighment slip will be the base for determining the refund amount. It may be necessary to look into the ledgers for the total quantity held by the stock-holder and particularly so in the case of non-ferrous scrap; the item concerned may have to be processed through special stock verification. In case of a short delivery of the material, the refund of taxes will be the responsibility of the successful bidder only.

**10. Conclusion of delivery.**

The seller's responsibility ends after the consignment has been loaded and handed over to the representative of the purchasers. The seller will be no party to any dispute that may arise after the loading has been completed.
